23 # Projects (optional).
24 #   Associate this post with one or more of your projects.
25 #   Simply enter your project's folder or file name without extension.
26 #   E.g. `projects = ["internal-project"]` references `content/project/
  deep-learning/index.md`.
27 #   Otherwise, set `projects = []`.
28 projects: []
29 ---
30
31 # This week has been quite unproductive.
32
33 I did the required minimum of my homework and spent my free time watching
  new series. I plan to do much more next week.
34
35 # My review of the week.
36
37 In conclusion, I would like to say there should be some weeks to just take
  a break and go for a walk.
38

30
31 Every week we do laboratory work. Then we should prepare a report on our
    labs. We perform reports for laboratory work with the use of the
    lightweight markup language markdown.
32
33 # What is MARKDOWN?
34
35 Markdown is a lightweight markup language for creating formatted text
    using a plain-text editor. John Gruber and Aaron Swartz created Markdown
    in 2004 as a markup language that is appealing to human readers in its
    source code form. Markdown is widely used in blogging, instant messaging,
    online forums, collaborative software, documentation pages, and readme
    files.
36
37 # How do we execute the report?
38
39 For each laboratory work, we have a template that we need to fill in with
    all the necessary information.
40 The title page of the report contains information about the number of the
    lab, the topic and the author of the report. Next, we describe the purpose
    of the laboratory work, the task, as well as a theoretical introduction.
41
42 And then the description of the main part of the work begins.
43
44 ## Description of the work.
